If your child enjoys playing with fingerpaint, they will have a blast making their own homemade fingerpaint! They can create their favourite colours and make masterpieces using their new paint. Your child can learn about primary colours along the way and which colours mix to form new colours.

INSTRUCTIONS:

1. Put the water, sugar, salt and cornflour into a small saucepan
2. Heat the mixture on a very low heat for about 15 minutes.
3. When the mixture begins to thicken, remove the saucepan from the heat and allow it to cool.
4. After the mixture has cooled, place a little of the mixture into each jar or cup and add some food colouring to each one.

Now you are ready to paint!
