Want to revive the cold, leftover pasta from last night? Glitter and glue can help you out! These spaghetti ornaments take seconds to make and are a great addition to a tree, gift or window. Plus, your child gets a fun lesson in shapes and hand-eye coordination on the side. So roll up your sleeves and go raid the fridge to make some spaghetti ornaments!

INSTRUCTIONS:
1. Have your child place a sheet of grease proof paper on the table for an easy to clean work area.
2. Pour some glue into the small bowl.
3. Now your child can dip a strand of spaghetti into the glue and arrange it on the wax paper into a curly S or curlicue shape. Make sure the strands are touching, so when it dries you can lift the shape off in one piece.
4. Repeat with as many strands as you'd like. How many words that begin with the letter S can your child think of?
5. Have your child sprinkle their creations with glitter. They may need to dab a bit more glue on them first, if it seems to have dried.
6. When finished, let the spaghetti ornament dry overnight.
7. Once the glue dries, carefully peel the wax paper off the spaghetti ornament.

Materials:
- Cold, cooked spaghetti (no sauce, please)
- Glue
- Glitter
- Grease proof paper
- Small bowl
